FACILITIES, OUTDOOR.

*** (d) Perimeter fence. On or after May 17, 2000, all outdoor housing facilities (i.e., facilities not entirely indoors) must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility. ***

Perimeter fence in rear animal area had a flatbed trailer parked next to it. Trailer and items on it lessent he effective height of the perimeter fence. Fence must be maintained in a way that does not diminish it's effective height. CORRECTED DURING INSPECTION.

Exit briefing conducted with facility pesonnel.
