Certificate: 22-C-0094

Site: 001

BRIDGET AND BURTON SIPP

ANIMAL KINGDOM ZOO

1800 JACKSONVILLE JOBSTOWN ROAD

Type: ROUTINE INSPECTION

Date: Feb-23-2012

BORDENTOWN, NJ 08505

2.40 (a) (1) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(a) Each dealer or exhibitor shall have an attending veterinarian who shall provide adequate veterinary care to its animals in compliance with this section.

(1) Each dealer and exhibitor shall employ an attending veterinarian under formal arrangements. In the case of a part-time attending veterinarian or consultant arrangements, the formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the premises of the dealer or exhibitor;

A written program of veterinary care remains unavailable for review. A written program of veterinary care must still be completed to address the following items:

Visits to the facility; Vaccinations; Parasite control; Emergency Care; Euthanasia; TB testing and additional program topics relating to animal health

2.40 (b) (2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:

(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care;

(3) Daily observation of all animals to assess their health and well-being; Provided, however, That daily observation of animals may be accomplished by someone other than the attending veterinarian; and Provided, further, That a mechanism of direct and frequent communication is required so that timely and accurate information on problems of animal health, behavior, and well-being is conveyed to the attending veterinarian;

Inspection Report

2. The coatimundi enclosure has a horizontal branch, from an adjacent pine tree, growing across the top. This large branch is pushing down on the top of the enclosure and causing one of the horizontal beams to sag. There is also an accumulation of pine needles and other debris on the top of the enclosure. This could impact the structural strength of the enclosure and negatively affect the animals housed therein. The branch and debris must be removed to prevent animal injury and further damage to the enclosure.

THE ABOVE TWO ITEMS MUST BE CORRECTED BY: MARCH 1, 2012

NOTES: A routine maintenance program should be implemented for the entire zoo to ensure that items, such as the items documented on 10-5-11, 11-21-11 and 2-23-12, are observed, recognized and addressed BEFORE they become problematic.

This inspection was conducted by Karla Wills, ACI and Keri Lupo, VMO on 2-23-12.

The exit briefing was conducted with the facility representative.
