BURTON SIPP

ANIMAL KINGDOM ZOO

1800 JACKSONVILLE JOBSTOWN ROAD

Type: ROUTINE INSPECTION

Date: May-23-2012

BORDENTOWN, NJ 08505

2.40 (a) (1) **REPEAT**

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(a) Each dealer or exhibitor shall have an attending veterinarian who shall provide adequate veterinary care to its animals in compliance with this section.

(1) Each dealer and exhibitor shall employ an attending veterinarian under formal arrangements. In the case of a part-time attending veterinarian or consultant arrangements, the formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the premises of the dealer or exhibitor;

A written program of veterinary care still remains unavailable for review. A written program of veterinary care must still be completed to address the following items for all covered species present:

Visits to the facility; Vaccinations; Parasite control; Emergency Care; Euthanasia; TB testing and additional program topics relating to animal health

*A new blank Program of Veterinary Care was provided during this inspection.

3.75 (a) **REPEAT**

HOUSING FACILITIES, GENERAL.

(a) Structure: construction. Housing facilities for nonhuman primates must be designed and constructed so that they are structurally sound for the species of nonhuman primates housed in them. They must be kept in good repair, and they must protect the animals from injury, contain the animals securely, and restrict other animals from entering.

Inspection Report

The following item is in need of repair, replacement or removal:

A wooden cross beam, at the top of the Diana monkey's outdoor enclosure, is severely rotted. This beam is across the center of the interior of the enclosure and supports the wire mesh as well as other smaller support beams.

Further deterioration of this support beam could impact the structural strength of the enclosure and negatively affect the Diana monkey housed therein. The deteriorated beam must be removed and replaced to prevent animal injury and to improve the structural integrity of the enclosure.

NOTES: A routine maintenance program should be implemented for the entire zoo to ensure that items, such as the items documented on 2-23-12 and 5-23-12, are observed, recognized and addressed BEFORE they become problematic.

This inspection was conducted by Karla Wills, ACI and Keri Lupo, VMO on 5-23-12.

The exit briefing was conducted with the facility representative.
