3.127 (d)

FACILITIES, OUTDOOR.

Sec. 3.127 Facilities, outdoor

(d) Perimeter fence. On or after May 17, 2000, all outdoor housing facilities (i.e., facilities not entirely indoors) must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility.

*****The perimeter fence was tilted in some areas and the nails were exposed in a couple of places which indicates that the fence is not structurally sound.

*****The perimeter shall be structurally sound and shall be maintained in good repair so that it can function as a secondary containment system for the animals in the facility. The fence must restrict unauthorized persons and animals from going through or under it and having contact with the animals in the facility.

***Correct by April 3 ,2011.

*****An exit interview was conducted with the licensee on February 3-2011.
