Type: ROUTINE INSPECTION
Date: 18-JUN-2014

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

A female coatimundi was observed by inspectors to be licking and biting at her left front leg during inspection. The area she was licking and biting was missing hair and slightly red. She was also seen scratching her back leg at times. The problem reportedly had not been noted by animal care staff prior to inspection. Signs observed in this coatimundi suggest that it may be itchy or uncomfortable. To be sure that the condition is not contagious and causing pain/discomfort, the Attending Veterinarian must observe and make treatment recommendations for this coatimundi. Promptly communicate any animal health problems to the Attending Veterinarian to ensure that appropriate treatment is provided at all times.

Correct by 6/20/14.

Exit interview conducted with facility representative.

Additional Inspectors

Ranslem Corbin, Animal Care Inspector

Prepared By: SCOTT WELCH, D V M USDA, APHIS, Animal Care
