EAST COAST EXOTIC ANIMAL RESCUE INC

320 ZOO ROAD

Type: ROUTINE INSPECTION

FAIRFIELD, PA 17320

Date: 12 February 2013

### 3.125 (a)

#### FACILITIES, GENERAL.

Structural strength. The facility must be constructed of such material and of such strength as appropriate for the animals involved. The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

The two barns available for the llama and goats each had holes in the siding on the uphill side which were large enough to allow an animals head to pass through. These holes need to be repaired to assure the animals are not trapped and injured. The facility also had boards and pieces of fencing laying on the ground within the enclosures. Any materials that could cause entrapment or injury need to be removed from animal areas. Correct By: 1 March 2013

### 3.127 (d)

#### FACILITIES, OUTDOOR.

Perimeter fence. On or after May 17, 2000, all outdoor housing facilities (i.e., facilities not entirely indoors) must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. Fences less than 8 feet high for potentially dangerous animals, such as, but not limited to, large felines (e.g., lions, tigers, leopards, cougars, etc.), bears, wolves, rhinoceros, and elephants, or less than 6 feet high for other animals must be approved in writing by the Administrator. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility.

The perimeter fence behind the Lion enclosure was observed to have been damaged by a tree and was not at the full height. The perimeter fence for this facility must be eight feet in height around the entire perimeter unless approved by the administrator as indicated above. Correct By:29 March 2013

An exit briefing was conducted with the facility representative.
