3.127 (c)

FACILITIES, OUTDOOR.

(c) Drainage. A suitable method shall be provided to rapidly eliminate excess water. The method of drainage shall comply with applicable Federal, State, and local laws and regulations relating to pollution control or the protection of the environment.

Standing water was noted in the area between the tufted and black/white capuchin enclosures on the east side of the property. The water ran the entire length of the enclosure sides and did not accumulate from recent enclosure cleaning. Standing water can become a breeding ground for microbes and vermin and the proximity of this water to the animal enclosures increases the risk of adverse health effects. A method of eliminating excess water must be implemented.

Correct by: May 27, 2011.

Exit interview conducted with licensee.
