Cottageville, SC 29435

Customer ID: **327333**
Certificate: **56-C-0233**
Site: 001
BEE CITY L L C

Type: ROUTINE INSPECTION
Date: 27-MAY-2014

2.40(b)(2) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

One male Patagonian cavy was observed to have abraded skin on the bottom of his testicles. This animal was housed on raised wire; this condition had not been noticed prior to inspection. The abraded area could not be fully visualized as the animal was not readily handled. Need to capture animal safely, evaluate wound, and provide veterinary care as needed. Animal should be housed on soft substrate until wound heals. Correct by May 28, 2014.

3.53(c)(2)

PRIMARY ENCLOSURES.

Thirteen recently weaned rabbits were housed together in a cage measuring approximately 3' by 3' with two 10" diameter food/water bowls which provides about 8 sq. ft. of floor space. Each rabbit this size requires 1.5 sq. ft.; 13 rabbits this size require 19.5 sq. ft. This enclosure does not provide the required floor space to ensure the rabbits have enough room to have adequate freedom of movement. Correct by June 2, 2014.

3.128

SPACE REQUIREMENTS.

Two capybaras were housed in an enclosure which had no pool. Capybaras are aquatic mammals and require a pool area so that they can engage in normal postural adjustments (submersion). Owner already has plans to build a new enclosure with a pool for swimming. Correct by June 30, 2014.

Exit briefing conducted with licensee.
