Type: ROUTINE INSPECTION

Date: 06-FEB-2014

3.75(f)

HOUSING FACILITIES, GENERAL.

(f) Waste disposal.

* The food storage room/chiller which contained food for the nonhuman primates had a large receptacle containing food waste and trash which did not have a lid. There were also a few small flies and rodent droppings observed in this food storage room.

** Trash cans without lids in food storage and preparation areas can attract disease-carrying pests and vermin which increase the chance of having contaminated food.

*** The licensee must ensure that all trash containers located in areas used for nonhuman primate food preparation/storage are leakproof and have a tight fitting lid on them at all times. CORRECT BY: 10 February 2014

The inspection and an exit interview were conducted with the licensee.
