HANDLING OF ANIMALS.

During public exhibition, any animal must be handled so there is minimal risk of harm to the animal and to the public, with sufficient distance and/or barriers between the animal and the general viewing public so as to assure the safety of animals and the public. A responsible, knowledgeable, and readily identifiable employee or attendant must be present at all times during periods of public contact.

The male white tail deer was now observed to be coming up to the public side of enclosure fence. This enclosure does not have any barrier, and the public can potentially have direct contact with this deer through the chain link fence. There is (are) no responsible, knowledgeable and readily identifiable employee(s) or attendant(s) in this general area.

A barrier fence shall be constructed at least 3 feet from the enclosure to prevent the public from having contact with the animals. Alternatively, you may station a responsible, knowledgeable and readily identified employee or attendant in this area at all times when the public is present.

Correct by September 15, 2013

The exit interview was conducted with the Animal Care & Medical Manager.
