Type: ROUTINE INSPECTION
Date: Jun-23-2015

3.125 (d)

FACILITIES, GENERAL

There is a large mound of animal feces and old bedding laying approximately 2 foot in front of the warthog enclosure. The inspector observed several flies swarming around the mound of animal waste. The mound of animal waste can potentially promote disease hazard and attract pests to the facility. Eliminate the animal waste through proper disposal from the facility as often as necessary to minimize vermin infestation, odors, and disease hazards.

Correct by July 1, 2015

Inspection and exit interview conducted by APHIS personnel with licensee.
