Type: ROUTINE INSPECTION
Date: Apr-28-2015

3.131 (d)

SANITATION.

Evidence of vermin/pest infestation was observed at the facility's food preparation room. Several spiders, a frog, and spider webs were observed making contact with recently washed food bowls. Additionally, rodent droppings were observed in the floor. The potential for contamination by vermin/pests should be minimized at all times to prevent health issues on the regulated animals. A safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained.

Correct by: May 5, 2015

An exit interview was conducted with a facility representative.
