Certificate: **56-C-0116**  
Site: 002  
T.I.G.E.R.S.

Type: ROUTINE INSPECTION  
Date: 11-JAN-2018

#### 3.75(a)

#### HOUSING FACILITIES, GENERAL.

Five areas of damaged and deteriorating roof tin/metal components were identified at the primary enclosure of two nonhuman primates (NHP's); gibbons named Santoshi and Saiuka. All roof damaged areas exhibit sharp points/edges which the gibbons could easily reach and/or grab. Also, several metal hose clamps attached to primary enclosures have exposed sharp ends that are in need of repair/adjustment. Damaged metal components with sharp points/edges identified on primary enclosures might injure regulated animals. Housing facilities for NHP's must be kept in good repair, and must be free of jagged edges; protecting regulated animals from injury, and containing the animals securely. All damaged and deteriorating metal components at primary enclosures must be repaired and/or replaced to prevent/eliminate the potential of an injury to regulated animals.

To be completed by: February 11, 2018

This inspection and exit interview were conducted with a facility representative.
