### 2.126 (a) (1)

#### ACCESS AND INSPECTION OF RECORDS AND PROPERTY.

(a) Each dealer, exhibitor, intermediate handler, or carrier, shall, during business hours, allow APHIS officials:

- (1) To enter its place of business;
- (2) To examine records required to be kept by the Act and the regulations in this part;
- (3) To make copies of the records;
- (4) To inspect and photograph the facilities, property and animals, as the APHIS officials consider necessary to enforce the provisions of the Act, the regulations and the standards in this subchapter; and
- (5) To document, by the taking of photographs and other means, conditions and areas of noncompliance.

\*\*\*On June 17, 2009 at 11:50 AM, I arrived at the licensed facility to conduct an animal welfare inspection. I called the contact phone number on file and spoke to the licensee. The licensee indicated there was no one available to accompany the inspector on an inspection at the present time. There must be a responsible individual available to accompany the USDA Animal Care Inspector on an animal welfare inspection to ensure the regulations and standards in the Animal Welfare Act are being followed, to insure the health, safety and welfare of the animals. Please contact the USDA, Animal Care Inspector with a schedule of availability.  
Correct by June 20, 2009.

### 2.40 (a)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(a) Each dealer or exhibitor shall have an attending veterinarian who shall provide adequate veterinary care to its animals in compliance with this section.

\*\*\*The skunk has excessively long nails. These need to be trimmed to prevent possible injury to the animal.

Correct by: 08-25-08.

### 3.78 (d)

#### OUTDOOR HOUSING FACILITIES.

(d) Perimeter fence. On and after February 15, 1994, an outdoor housing facility must be enclosed by a fence that is of sufficient height to keep unwanted species out. Fences less than 6 feet high must be approved by the Administrator. The fence must be constructed so that it protects nonhuman primates by restricting unauthorized humans, and animals the size of dogs, skunks, and raccoons from going through it or under it and having contact with the nonhuman primates. It must be of sufficient distance from the outside wall or fence of the primary enclosure to prevent physical contact between animals inside the enclosure and outside the perimeter fence. Such fences less than 3 feet in distance from the primary enclosure must be approved by the Administrator.

\*\*\*The outdoor enclosure for the four ringtail lemurs does not have a perimeter fence. A perimeter fence needs to be erected or a variance must be requested in writing to the Region Office.

Correct by: 09-04-08.

Inventory: Ringtail lemurs-3.1 Skunk-1. Tigers-.2 Coatimundis-1.1 Leopard-.1

## Inspection Report

---

NOTE: The black leopard has recently been declawed. This is no longer allowed. Mr. Bovard stated that he was unaware of this and stated that his previous inspector had not informed him of this change. This was discussed during this inspection. To read more about the issue of declawing in large felids please refer to the animal care website: [www.aphis.usda.gov/ac](http://www.aphis.usda.gov/ac).

NOTE: Public barriers must be put into place when members of the public are allowed onto the facility premises for viewing of the animals.

End of report.

**2.131** (c) (1) **REPEAT DIRECT NCI**

### HANDLING OF ANIMALS.

(c)(1) During public exhibition, any animal must be handled so there is minimal risk of harm to the animal and to the public, with sufficient distance and/or barriers between the animal and the general viewing public so as to assure the safety of animals and the public.

- I checked the set up of the licensee at his facility and there has been improvement in the barriers both in height and in placement. However, there still needs to be some improvement in the construction and placement of the barriers.
- Barriers are essential to keep the animals and public from contact which can lead to injury of a member of the public and subsequently to the tigers.
- Continue to construct the barriers and place them so that there can be no contact between the public and the tigers.

NOTE - could not visualize the tethering system today

**DIRECT NCI**

### HANDLING OF ANIMALS.

(c)(1) During public exhibition, any animal must be handled so there is minimal risk of harm to the animal and to the public, with sufficient distance and/or barriers between the animal and the general viewing public so as to assure the safety of animals and the public.

1. - The tiger used for photos is leash - walked from the trailer to the table where the photos are taken. There is not a sufficiently high or strong public barrier to prevent the tiger from exiting the area and injuring a member(s) of the public.

- It has been determined that leash walking of large felids without a sufficiently high and strong public barrier is not safe.

- Insure that a sufficiently high and strong public barrier is in place to protect the viewing public and subsequently the tiger.

2. - There is no barrier between the person being photographed and the tiger.

- The person being photographed is considered a member of the general viewing public and therefore there must be an additional barrier between that person and the tiger.

- Insure that there is a sufficiently high and strong barrier between the tiger and the person being photographed.
